This section is intended for all students who study calculus, and considers about 70 typical problems on infinite sequences and series, fully solved step-by-step. An infinite series of ... Leonhard Euler continued this study and in the process solved many important problems. ... depends on the Newtonian Infinite Series ... CHAPTER 12 INFINITE SEQUENCES AND SERIES ... After the students have warmed up by doing one or two of the problems as a class, have them start working. When $p = 1/2$, the series in p still sums to $\log(1/p) = \log 2$. Here, $q = 1$ which is outside the radius of convergence of $\log(1 + q)$. However, 1
